

Lacock Primary School - Computing Year 1 and 2

Important Vocabulary

Algorithm	<i>A set of clear, precise instructions</i>
command	<i>instruction</i>
sprite	<i>character</i>
code	<i>the algorithm</i>
debug	<i>Finding the problem</i>
sequence	<i>Order of events</i>
predict	<i>Sensible guess</i>
background	<i>At the back of</i>
delete	<i>Remove</i>

Move right

Move left

Move up

Move down

Turn

Commands can be joined together

Make bigger

I can make an algorithm of commands to move my sprite.

Key Skills

- To combine forwards and backwards commands to make a sequence
- To combine four direction commands to make sequence
- To create an algorithm
- To debug an algorithm

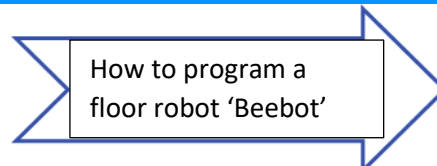

<https://www.scratchjr.org/>

Key Knowledge/Facts

- To know that an algorithm is a series of precise instructions that computers follow
- To know how to move a sprite forwards, backwards and to turnaround.
- To know that the series of instructions they are commanding the sprite to follow is an algorithm.
- To know that debugging is solving a problem in their algorithm.
- To know what each command in Scratch program does.

What I should already know:

This learning will help me in the future when I learn:
